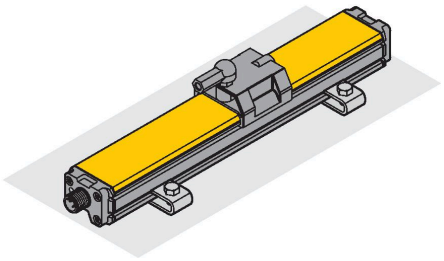
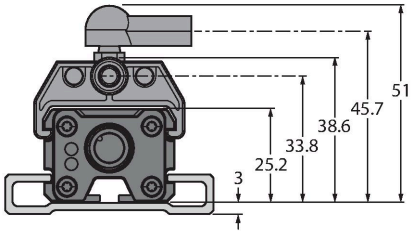
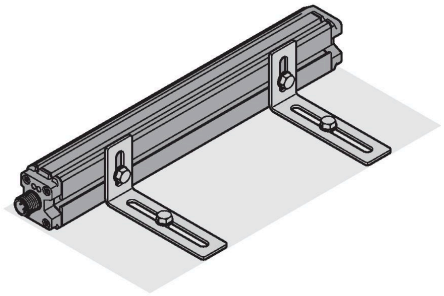
and tear-free, thanks to the contactless operating principle. They convince through their excellent repeatability, resolution and linearity within a broad temperature range. The innovative technology ensures a high immunity to electromagnetic DC and AC fields.

Mounting instructions

Mounting instructions/Description







Extensive mounting accessories provide various options for installation. The measuring principle of RLC coupling makes the sensor immune to magnetized metal splinters and other interference fields.

LED indicates status:
Green:
Sensor is supplied properly, asynchronous mode
Green flashing:
Sensor is supplied properly, synchronous mode
Green fast flashing:
Sensor is supplied properly but is not receiving CLK pulses from the SSI master

LED indicates measuring range
Green:
Positioning element is in range
Yellow:
Positioning element is in range, signal low (e.g. distance too great), see status bit 22
Yellow flashing:
Positioning element is out of range, see status bit 23
LED OFF:
Positioning element is outside the programmed range (only with teachable versions)

Note: Pin 8 should be kept potential-free
